Project Experience

Fokus AI Video Generator Platform

Nov 2025

AI & Automation Web Application Developed an integrated web platform combining two generative video models (Google Veo and Sora 2) into a single interface. Focused on solving API accessibility issues through advanced browser automation and scalable hybrid architecture.

- **Dual-Engine Integration** : Enabled seamless switching between Google Veo and Sora 2 models for flexible content generation.
- **Automation Middleware** : Developed a Playwright-based service to handle complex authentication (reCAPTCHA & Bearer Token interception) automatically.
- **Secure Tunneling** : Implemented Cloudflare Tunnel infrastructure to securely connect cloud automation services with the main application.
- **Intuitive UI** : Created a user-friendly interface for video generation parameters (prompt, aspect ratio, duration) with real-time result previews.
- **Stability Systems** : Implemented queue management and human simulation to ensure the stability of the video generation process.
- **Tech Stack** : Next.js, Tailwind CSS, Framer Motion (Frontend); Node.js (Backend).

1612 Coffee Roastery Web Platform

Oct 2025

Full-Stack Web Application Developed a full-stack web application for a specialty coffee roastery to manage online orders, roasting services, and shipping workflows. Focused on seamless user experience and efficient back-office operations.

- **Online Catalog** : Showcasing coffee beans, roasting services, and additional products.
- **Smart Checkout** : Cart and checkout flow that separates services (roasting) from physical products.
- **Logistics** : Integrated shipping cost calculation and order management using JNE Cargo and regular courier services.
- **Dashboards** : Dedicated customer dashboard for order history/tracking, and an Admin dashboard for managing products, roasting services, and shipments.
- **Tech Stack** : React, Tailwind CSS, Framer Motion (Frontend); Node.js & Express (Backend).

ApotekSehat - Pharmacy Inventory & Management System

Oct 2025

Web-Based Inventory System Designed a web-based inventory system offered as a service for small pharmacies, allowing owners to monitor stock, users, and transaction history in a single dashboard.

- **Role-Based Access** : Defined access levels for Super Admin, Pharmacy Owner, and Staff.
- **Inventory Management** : Comprehensive tracking of drug stocks, units, categories, batches, and expiration dates.
- **Smart Monitoring** : Alerts for low stock and expiring items to prevent stockouts and waste.
- **Transaction Tracking** : Recorded inbound/outbound stock transactions with edit history for audit trails.
- **Tech Stack** : Node.js/Express, MySQL/MariaDB (Backend with JWT Auth); React, Tailwind CSS (Frontend).

Skills

Languages : Indonesian (Native/Bilingual), English (Intermediate)

Technical Skills:

- **Web Development** : HTML, CSS, JavaScript, React.js, Next.js, Node.js, Express.js, REST API
- **Databases** : MySQL / MariaDB, SQL, MongoDB
- **Tools & Others** : Git & GitHub, Tailwind CSS, Framer Motion, Microsoft Office
